Appendix 8. FarEarth Director and Processing System - User Manual v4.1

1. Object

Since the system related to SAWIDRA project is established in 2021, SOLETOP performs maintenance for 3 years onsite. And this year, 2023, is the 2st year of maintenance. The maintenance tasks cover Hardware (Antenna, ICT & RF equipment), FarEarth software which performs receiving, processing, and distribution of satellite imagery.

2. Place/Period

- Place: South African National Space Agency (SANSA) Space Operation
 - Farm NO. 502JQ, Hartebeesthoek, Districk Krungersdorpp, 1740
- Period: From 14rd to 16th August 2023

3. Participants

- SANSA: Themba, MBULE
- SOLETOP: Zee Seong Kang
- Pinkmatter Solution (Online Support): Josef Hlawatschek

4. Maintenance Schedule

Date	Task
14 rd , August	<ul style="list-style-type: none"> - SOLETOP installed Anydesk to get remote access from SOLETOP HQ to monitor de system - Hardware Maintenance(1/2) - 3.0m antenna system <ul style="list-style-type: none"> ✓ Antenna System Overview (Diagram) ✓ Antenna Positioner ✓ Antenna Control Unit (ACU) ✓ Feed & Downconverter ✓ Dehydrator
15 th , August	<ul style="list-style-type: none"> - Re-configure the demodulator configuration file in FarEarth Acquisition Control S/W - D-300 OS root user password find & init
16 th , August	<ul style="list-style-type: none"> - Software Maintenance - Hardware Maintenance (2/2) <ul style="list-style-type: none"> ✓ X/L-Band Datalink Demodulator(D-300) - LRD-200B, HRD-200B collection - Reporting Maintenance result

5. Reference Documents

Documents covers hardware (Antenna system and ICT Unit) and Software (Pinkmatter – FarEarth) components separated as below.

No.	Documents
[M-HW-01]	2.4XLC-3.0m Installation, Operation and Maintenance Manual
[M-HW-02]	D300 Installation, Operation and Maintenance Manual REV A.11
[M-HW-03]	D300 Software Update Procedure
[M-SW-01]	SAWIDRA - Overview Document v1.1
[M-SW-02]	FarEarth Acquisition System - User Manual v3.1
[M-SW-03]	FarEarth Acquisition System - Deployment and Configuration Manual v3.1
[M-SW-04]	FarEarth Director and Processing System - User Manual v4.1

6. System Configuration

6.1 Hardware (Antenna and ICT)

Division	Item
Antenna System	<ul style="list-style-type: none"> · 3.0 m Reflector Dish & Positioner · ACU · Feed & Downconverter · Dehydrator · X/L-Band Datalink Demodulator (D-300)
ICT System	<ul style="list-style-type: none"> · Server · Desktop PC & Monitor · UPS/AVR · Rack cabinet assembly

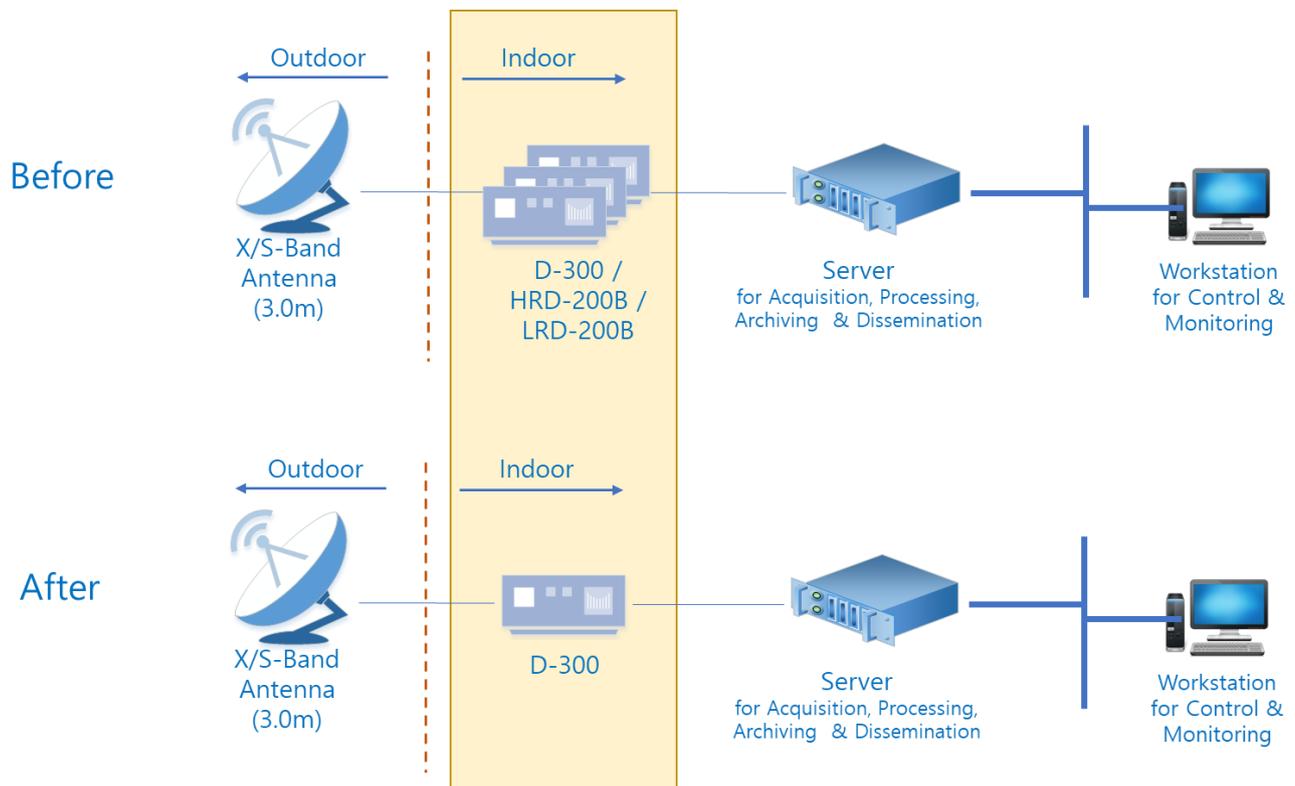

Figure 1. Hardware Configuration

Figure 2. Outdoor – 3.0m Antenna placement

Figure 3. Indoor - Rack cabinet & ICT equipment arrangement

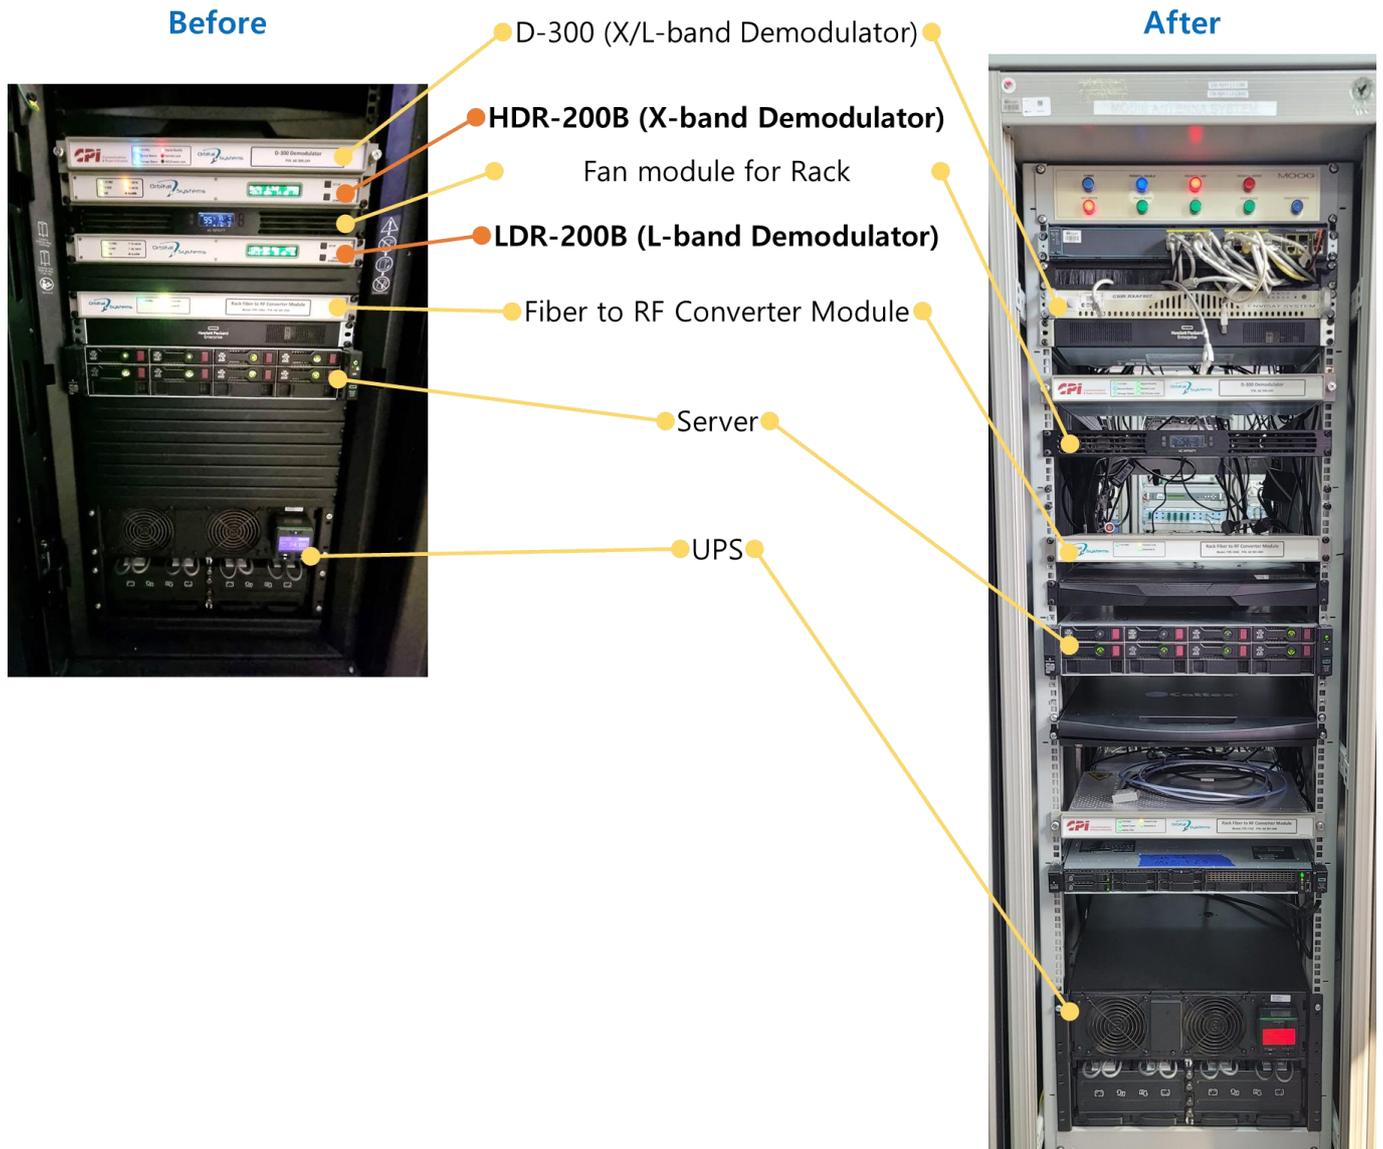

Figure 4. Rack configuration

SANSA moved the hardware from half rack to frame rack. LRD-200B and HRD-200B have been removed.

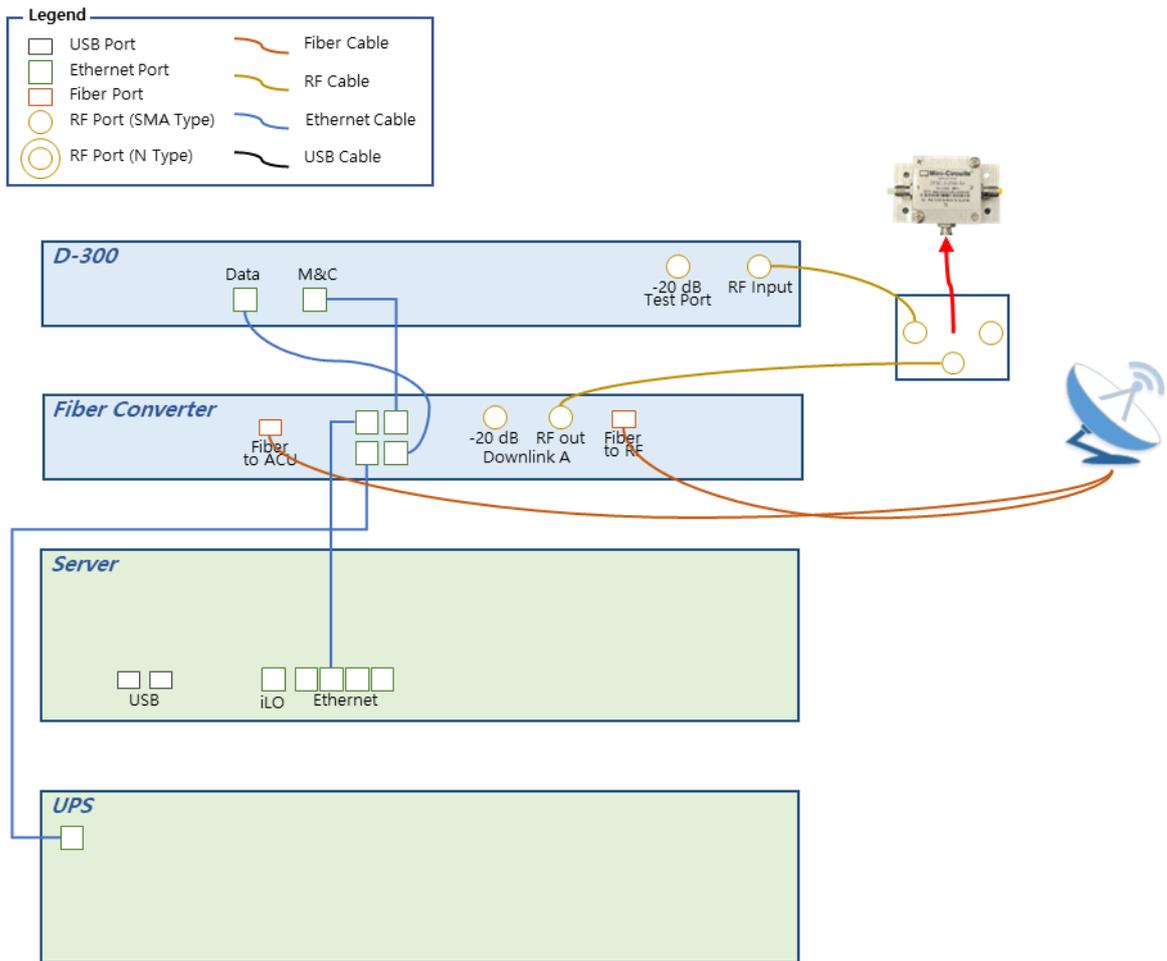

Figure 5. Rack Wiring Diagram #1

6.2 Software (FarEarth)

Division	Item
Satellite Ground Station Solutions	<ul style="list-style-type: none"> · Acquisition Management Software <ul style="list-style-type: none"> - FarEarth Acquisition System <ul style="list-style-type: none"> : Acquisition Controller, Observer · Processing Management Software <ul style="list-style-type: none"> - FarEarth Processing Automation System <ul style="list-style-type: none"> : DataPoint, Director, Processor

In Figure 7, the green colored items represent data flow and the Software components. Blue colored items represent Control flow and the items external to FarEarth software components. Yellow represent the external configured sources required.

8. Others

8.1 D-300 Installation

During the maintenance period, the demodulators of HRD-200B and LRD-200B were uninstalled.

The direct connection between the D-300 demodulator and the Fiber Converter has been completed. Please refer to the attached image below.

Figure 8. D-300 Installation (RACK Front)

8.2 Internet Speed Test

In order to check for a smooth transmission of received data to GTS, we tested internet speed itself through the websites ‘https://fast.com’ and ‘https://speedtest.net’. The tests resulted in the upload speed of 720 Mbps and 1 Gbps respectively.

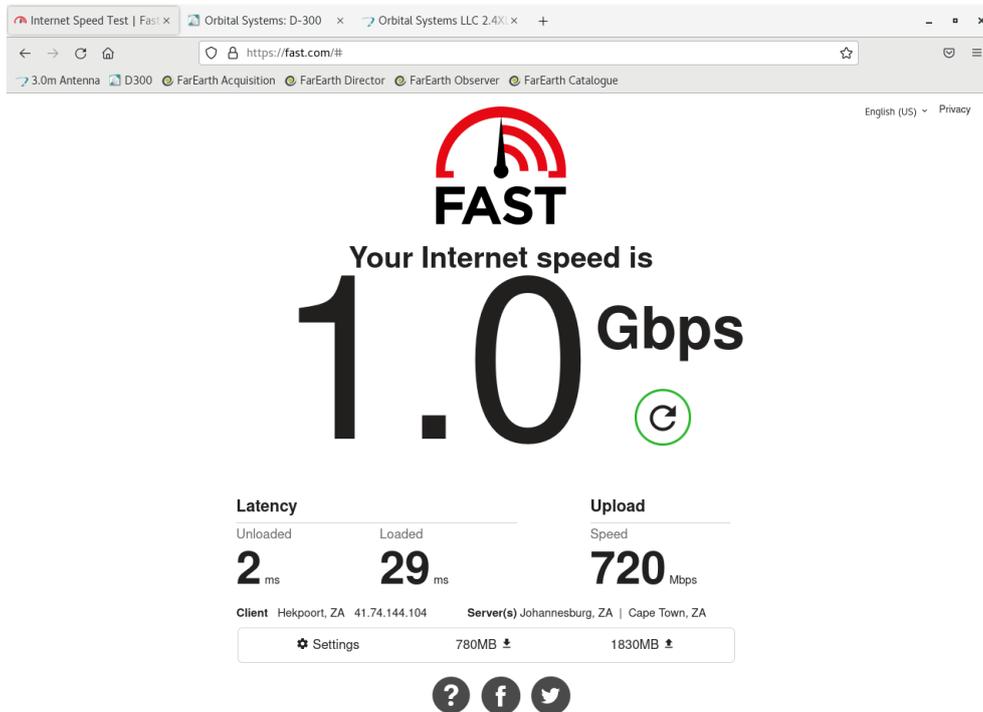

Figure 10. Internet Speed Test Result #1 (fast.com)

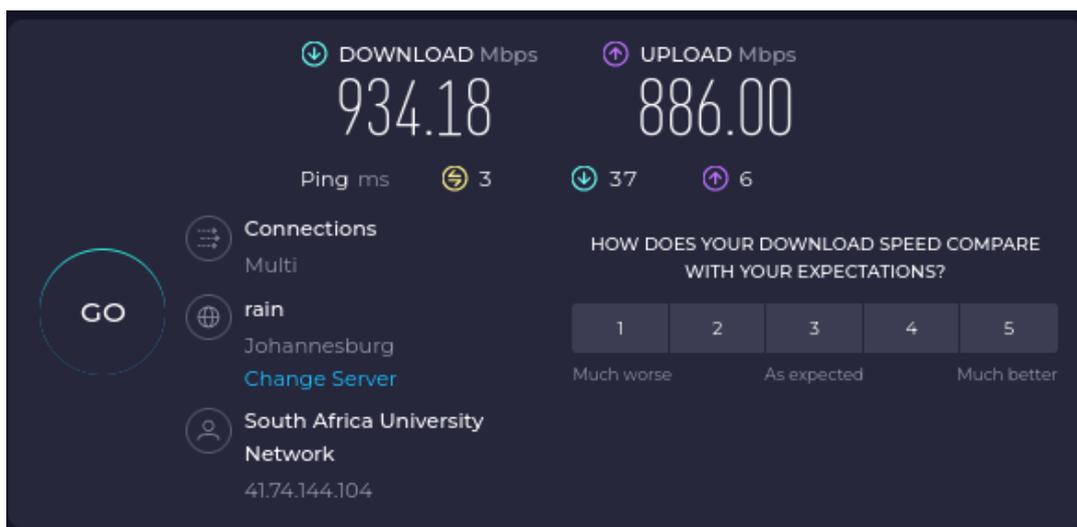

Figure 11. Internet Speed Test Result #2 (www.speedtest.net)

8.3 Network Configuration

SANSA/SOLETOP checked the entire network IP setting. Below is the relevant information:

Classification	ID	Password	Category	IP
	farearth	hbksawidra2020hbk	SANSA Network	xx.xx.144.104
			Interface with ACU and D-300 M&C link	xxx.xxx.127.180
			Interface with D-300 data link	xxx.xxx.127.174
	admin	admin	D-300 Demodulator	xxx.xxx.127.173
Anydesk	1635321226	Soletop@SW2023!!	SANSA Network	xx.xx.144.104
Software	operator	sawidra	FarEarth Acquisition-Controller-	xx.xx.144.104:8085
	operator	sawidra	FarEarth Director	xx.xx.144.104:8082
	operator	sawidra	FarEarth Catalogue	xx.xx.144.104:8081/catalogue
	operator	sawidra	FarEarth Observer	xx.xx.144.104:8080/observer

SOLETOP checked SANSA's VPN settings and connection status so that Pinkmatter could access the server remotely.

8.4 LRD-200B, HRD-200B recovered

Pre-separated and packed from SANSa before SAWIDRA maintenance period. I will recovered demodulators and return to SOLETOP

Figure 12. LRD-200B, HRD-200B Packaging

8.5 RF

I prepared and provided two pairs of spares, RF divider and RF cable, in preparation for the use of D-300.

Figure 13. two pairs of spares RF divider and RF cable

9. Maintenance Result

During the 2023 SAWIDRA maintenance period in SANSA, i recovered the HRD/LRD-200B demodulator.

Initialized password for root user, OS account od D-300.

D-300 registered in FarEarth system.

I delivered two pair of RF divider and RF cable with spares.

SOLETOP installed Anydesk to get remote access from SOLETOP HQ to monitor de system.

There are no singularities, such as Internet speed, in relation to GTS transfer testing SANSA
